All the Superintending Engineers,
HPPWD,
All the Executive Engineers
HPPWD

Subject:- Execution of AMP/ periodic renewal works.

AMP/periodic renewal works are executed with the aim of improving the pavement condition of the roads for better riding quality.

Instances have come to the notice of this office that AMP/ periodic renewal works on some roads with Bituminous concrete are being executed where all required machinery i.e. Paver, vibrating roller & static roller access are not feasible and cannot move freely due to site restrictions, insufficient geometrics of the roads etc which is affecting the quality of AMP/ renewal works.

In this context, it is instructed to propose AMP/ periodic renewal with BC only for those roads/work sites, where access and movement of all required machinery for BC i.e. Paver, vibrating roller & static roller is possible. In roads/work sites where access and free movement of all above components of machinery is not possible, the AMP/ periodic renewal be proposed with conventional premix carpet only.

You are, therefore directed to adhere to above instructions strictly in future.
